

Monster Melt Premium Ice Melt's Special Formulation Outperforms Other Ice Melters!

Monster Melt is a special formulation of calcium chloride, magnesium chloride, potassium chloride (a fertilizer) and sodium chloride, coated with calcium magnesium acetate (CMA).

Monster Melt will melt more snow and ice than most other products. It works faster and down to -10°F , a temperature at which most other products have stopped working. Monster Melt is formulated to be seen when used. Most "white" ice melt products disappear into snow and ice. Users tend to over-apply, or worse, under-apply product because they can't see where it lands. Monster Melt provides proof positive that an ice melter is in use.

Because Monster Melt melts more effectively than other products, a smaller quantity is needed to remove snow and ice. Consequently, environmental impact on ground and vegetation is reduced.
